## Parallax Free Outside Inch Micrometers

Micrometers & Sets

No. 52-233-001

Quick reading micrometer with a special parallax free thimble and sleeve. Easier to read than standard vernier micrometers, the barrel is graduated in 0.001" with a .0001" reading vernier.

### Special Features:

- Insulated steel frame
- Carbide tipped jaws
- Resolution: 0.0001"
- Micro-lapped measuring faces
- Ratchet spindle with lock
- Clearly marked graduations
- Satin chromed thimble and sleeve
- Insulated plates on the frame prevent changes in readings due to temperature fluctuation.
- Includes fitted storage case
- Meets or exceeds Federal accuracy specs.

### Parallax Free

**Unique thimble design with graduations on one plane reduces reading errors!**

| Order No.             | Range           | Graduation | Thimble |
|-----------------------|-----------------|------------|---------|
| 52-233-001            | 0—1"            | .0001"     | Ratchet |
| 52-233-002 w/standard | 1—2" w/standard | .0001"     | Ratchet |
| 52-233-003 w/standard | 2—3" w/standard | .0001"     | Ratchet |
