

Fred V. Fowler Company, Inc.

Precision N/C & Machining Vises

Fowler precision N/C vises have bi-directional 11/16" keyways ground in the bottom to allow rapid installation and automatic alignment. These precision vises will bolt easily onto N/C, milling, EDM or other machines. All four sides are slotted to provide a multitude of clamping possibilities.

Both the fixed and moveable jaws are stepped to permit the effortless holding of pieces as small as 1/2" x 1/2" or as large as 7-1/2" x 8-1/2", depending on the model. This offers more capacity than comparable vises on the market today due to a new angled channel. All jaw opening changes can be accomplished without unbolting the vise from the work surface.

Special Features:

- Bodies and moveable jaws are solid one piece construction.
- Can be purchased in pairs with matched accuracy to .0001" or .0002".
- Hardened to: RC58-62.
- Flat, square and parallel to .0003".

Order No.	Dimensions	Capacity	Jaw Height
57-226-411	11" x 4" x 3"	7-1/2"	1-7/16"
57-226-612	12" x 6" x 3-7/16"	8-1/2"	1-11/16"
